Bias in Psychological Assessment - Reynolds - 2012 - Major

Wechsler Intelligence Scale for Children (WISC) is an individually administered intelligence test for children between the ages of 6 and 16. The Fifth Edition (WISC-V; Wechsler, 2014) is the most recent version. The WISC-V takes 45–65 minutes to administer. It generates a Full Scale IQ (formerly known as an intelligence quotient or IQ score) that represents a child's general intellectual ability.

Night terror - Wikipedia

Children. Night terrors typically occur in children between the ages of three and twelve years, with a peak onset in children aged three and a half years old. An estimated 1–6% of children experience night terrors. Children of both genders and all ethnic backgrounds are affected equally.

Overview of Psychological Testing - Psychological Testing

Psychological assessment contributes important information to the understanding of individual characteristics and capabilities, through the collection, integration, and interpretation of information about an individual (Groth-Marnat, 2009; Weiner, 2003). Such information is obtained through a variety of methods and measures, with relevant sources determined by the specific purposes of the assessment.

R. Mahendran MMed(Psych), V.R. Preedy PhD, in Diet and Nutrition in Dementia and Cognitive Decline, 2015

The Wechsler Intelligence Scale for Children (WISC) is an individually administered intelligence test for children between the ages of 6 and 16. The Fifth Edition (WISC-V; Wechsler, 2014) is the most recent version. The WISC-V takes 45–65 minutes to administer. It generates a Full Scale IQ (formerly known as an intelligence quotient or IQ score) that represents a child's general intellectual ability.

Wechsler Memory Scale Fourth Edition. The Wechsler Memory Scale (WMS-IV) is an individually administered battery that allows practitioners to understand the full range of an examinee’s memory functioning.

Larry P. v. Riles, 495 F. Supp. 926 (N.D. Cal. 1979) :: Justia

The position of the United States is that the use of I.Q. test scores to effect the placement of black children in special education classes violates federal law, including the provisions mentioned before, as well as the Education for All Handicapped Children Act, 20 U.S.C. § 1401 et seq., and section 504 of the Rehabilitation Act of 1973, 29 U.S.C. § 794.
