Iodine-Haven Kimmel 2008 Living a highly functional if impoverished existence after running away from her abusive home, unconventional college senior Tracey Sue is forced to face her painful past when she falls in love with a much-older man, prompting her to re-experience a traumatic suppressed memory that makes her realize that much of her present life is a carefully constructed illusion. 40,000 first printing.

The Solace of Leaving Early-Haven Kimmel 2003 Langston Braverman abandons her academic career to retreat to her parents' attic, until the murder of her childhood friend Alice and an encounter with Amos Townsend, a local preacher, transforms her life.

Something Rising-Haven Kimmel 2010-05-11 In her first two books, Haven Kimmel claimed her spot on the literary scene- surprising readers with her memoir, A Girl Named Zippy, and winning an outpouring of critical acclaim for her first novel, The Solace of Leaving Early. Now, in her second novel, she brings to the page a heroine's tireless quest for truth, love, justice, and the perfect game of 9-ball. Cassie Claiborne's world is riddled with problems beyond her control: her hard- living, pool-shooting father has another wife; her stoic, long-suffering mother is incapable of moving herself mentally away from the kitchen window; her sister Belle is a tempest of fragility and brilliance; her closest friends, Puck and Emmy, are adolescent harbingers of their own doomed futures. Frustrated by her inability to care deeply enough for so many troubled souls, Cassie finds in the local pool hall an oasis of green felt where she can master objects and restrain her emotions. As Cassie grows from a quietly complex girl into a headstrong young woman, she takes on the thankless role of family provider by working odd jobs and hustling pool. All the while, she keeps her eye on the ultimate prize: wringing suitable justice out of past wrongs and freeing herself from the inertia that is her life. In this ultimately uplifting story, Haven Kimmel reaches deep into the hamstrung souls of her fictional corner of Indiana. Remarkable for its tough tenderness, Something Rising (Light and Swift) is an astonishing work of pure heartbreak.

Iodine-Haven Kimmel 2008-08-05 Haven Kimmel, the #1 New York Times bestselling author, has long attracted legions of fans for her insightful, humane portraits of outsiders struggling to find their place in the world. In Iodine, her fourth novel, Kimmel once again draws on her exceptional powers of observation and empathy, but this time she makes an exhilarating foray into psychological gothic territory with the electrifying story of a young woman emerging from layers of delusion, fantasy, and lies. With her astounding intelligence, fierce independence, and otherworldly lavender eyes, college senior Trace Pennington makes an indelible impression even as questions about her past and her true identity hover over every page. From her earliest years, Trace turned away from her abusive mother toward
her loving father. Within the twisty logic of abuse, her desperate love for him took on a romantic cast that persists to this day, though she's had no contact with her family since she ran away from home years ago. Alone but for her beloved dog, she's eked out an impoverished but functional existence, living in an abandoned house, putting herself through college, and astonishing her teachers with her genius and erudition. What they don’t know is that she leads a double life: thanks to forged documents, at school she is Ianthe Covington, a young woman with no past. Trace’s singular life is upended when she and her literature professor fall in love. She tells him nothing about her life, and as it becomes apparent that he has his own dark secrets, she’s forced to face herself and her past. After recovering a horrific, long-suppressed memory, Trace finally copes with the fallout from her brutal, bizarre childhood. Kimmel parcels out Trace's strange, dark story in mesmerizing bits that obscure as much as they reveal, and keep the reader guessing until the end. With Kimmel’s radiant imagination, lyrical prose, and vision of a bleak and fertile Midwest on full display, Iodine is a frightening and marvelous tale of life at the outer extremes of human experience. This unique portrait of the psychological effects of trauma is tantalizing, shocking, and ultimately hopeful.

A Girl Named Zippy-Haven Kimmel 2002 The author offers a chronicle of growing up in a small town in America's heartland, offering portraits of her family and her encounters with the complexities of the adult world, romance, and small-town life during the 1960s and 1970s.

The Used World-Haven Kimmel 2008-06-03 Spending their days at a sprawling Indiana antique mart surrounded by dusty furniture and cast-off clothing, Hazel, Claudia, and Rebekah find their circumstances revitalized by three romances and the unexpected arrival of two babies. By the author of A Girl Named Zippy. Reprint. 40,000 first printing.

Stunt-Claudia Dey 2008 Nominated for the Amazon.ca First Novel Award Eugenia Ledoux, nine years old, wakes to a note from her father: 'gone to save the world. sorry. yours, sheb wooly ledoux. asshole.' Eugenia is left behind with her mother, the sharp-edged B-movie actress Mink, and her sister, the death-obsessed and hauntingly beautiful Immaculata. When Mink climbs into the family car and vanishes, Eugenia doubles in age overnight, but remains the dark and diminutive creature who earned the nickname ‘Stunt.’ Eugenia devotes herself to finding Sheb. She writes to the man she believes to be Sheb's father: I.I. Finbar Me The Three, a retired tightrope walker. Waiting for Finbar's response, she retreats to Toronto Island, where she meets Samuel Station, a barefoot voluptuary, world traveller and ring-maker. When Finbar does write back, Eugenia wonders if she will find what she is looking for - or something else entirely. Studded with postcards from outer space, twins, levitation, the explosion of a shoulder-pad factory, and some accomplished taxidermy, Stunt is part dirge, part cowboy poetry and part love letter to the wilder corners of Toronto and of ourselves. 'Claudia Dey's debut novel is like a snowflake, utterly unique, compellingly intricate and sparkle-riven, sharp as broken crystal and just as dazzling. Stunt is daring, poignant, full of abandon and abandonment, wistful and funny. Brilliant.' - Lisa Moore 'Dey's ... prose [is] a wondrous compression of poetry, her carnival of characters drawn in gripping detail, and the riot of fantastical yet gritty imagery all shot through with a keen and relentless sadness. The sheer density of the imagery and vivid characterizations makes you slow down to enjoy every sentence. You want to read this novel carefully; you want to read it again.' - The Globe and Mail 'Stunt is mesmerizing, rewarding, and breathtaking. Dey never lets up' - Quill & Quire.

She Got Up Off the Couch-Haven Kimmel 2007-02-13 A continuation of the memoir "A Girl Named Zippy" follows the story of her mother, Delonda, who reinvents her life by returning to college and losing fifty pounds, while Zippy continues to work out the dynamic of their nuclear family.

Signposts in a Strange Land-Walker Percy 2011-03-29 Writings on the South, Catholicism, and more from the National Book Award winner: “His nonfiction is always entertaining and enlightening” (Library Journal). Published just after Walker Percy’s death, Signposts in a Strange Land takes readers through the philosophical, religious, and literary ideas of one of the South's most profound and unique thinkers. Each essay is laced with
wit and insight into the human condition. From race relations and the mysteries of existence, to Catholicism and the joys of drinking bourbon, this collection offers a window into the underpinnings of Percy’s celebrated novels and brings to light the stirring thoughts and voice of a giant of twentieth century literature.

Orville-Haven Kimmel 2003 Chained alone in a barn by the couple he thought might give him a good home, a very ugly stray dog is miserable until a new neighbor, Sally MacIntosh, moves into the little house across the road and he falls in love. 20,000 first printing.

Walking Through Walls-Philip Smith 2008-09-16 Running with Scissors meets Bewitched in this irresistible memoir, as Philip Smith describes growing up in 1960s Miami with his decorator father, who one day discovers he has the miraculous power to talk to the dead and heal the sick. After a full day of creating beautiful interiors for the rich and famous, Lew Smith would come home, take off his tie, and get down to his real work as a psychic healer who miraculously cured thousands of people. For his son, Philip, watching his father transform himself, at a moment’s notice, from gracious society decorator into a healer with supernatural powers was a bit like living with Clark Kent and Superman. Walking Through Walls is Philip Smith’s astonishing memoir of growing up in a household where séances, talking spirits, and exorcisms were daily occurrences, and inexplicable psychic healings resulted in visitors suddenly discarding their crutches and wheelchairs or being cured of fatal diseases. While there are benefits to having a miracle man in the house, Philip soon discovers the downside of living with a father who psychically knows everything he is doing. Surrounded by invisible spirits who tend to behave like nagging relatives, Philip looks for ways to escape his mystical home life -- including forays into sex, surfing, and even Scientology. By turns hilarious and profound, Walking Through Walls recounts Philip Smith’s often bizarre but always magical coming of age in a household that felt like a cross between Lourdes and the set of Rosemary’s Baby, and shows how he managed to map out his own identity in the shadow of a father who, truly, loomed larger than life itself.

The Transcriptionist-Amy Rowland 2015-01-20 “Haunting and provocative . . . Rowland’s writing is compelling and masterful.” —Delia Ephron, author of The Lion Is In Once, there were many transcriptionists at the Record, a behemoth New York City newspaper, but new technology has put most of them out of work. So now Lena, the last transcriptionist, sits alone in a room—a human conduit, silently turning reporters’ recorded stories into print—until the day she encounters a story so shocking that it shatters the reverie that has become her life. This exquisite novel, written by an author who spent more than a decade as a transcriptionist at the New York Times, asks probing questions about journalism and ethics, about the decline of the newspaper and the failure of language. It is also the story of a woman’s effort to establish her place in an increasingly alien and alienating world. “The Transcriptionist is suffused with prescient insight into journalism, ethics, and alienation . . . A thought provoking, original work.” —New York Journal of Books “Rowland seems that rare thing, the naturally gifted novelist . . . [She] deftly maps a very specific kind of urban loneliness, the inner ache of the intelligent, damaged soul who prefers the company of ideas and words to that of people . . . That urge—to make words holy—is at the heart of this novel’s strange, sad beauty.” —The Washington Post “The Transcriptionist holds many pleasures . . . [and] can be read through many lenses . . . Rowland plays with the notions of truth and reliability . . . Sharp and affecting.” —The New York Times Book Review “A strange, mesmerizing novel . . . about the decline of newspapers and the subsequent loss of humanity—and yes, these are related.” —Booklist, starred review “Ambitious and fascinating . . . Disturbing and powerful.” —Library Journal “Entering the city Rowland creates, with its tightly strung dialogue and soulful, lonely citizens, is a memorable experience.” —The Boston Globe “Unforgettable. Written with such delight, compassion, and humanity it’s newsworthy.”—Alex Gilvarry, author of From the Memoirs of a Non-Enemy Combatant

Atmospheric Disturbances-Rivka Galchen 2008-05-27 Convinced that his wife has disappeared and left behind a duplicate of herself who fools everyone else, Dr. Leo Liebenstein embarks on a quixotic journey to reclaim his lost love, an effort during which he is aided by a deluded psychiatric patient and an enigmatic meteorologist.
Kaline Klattermaster's Tree House-Haven Kimmel 2010-04-06 Kaline Klattermaster LOVES his mom. ADORES his mom. But his mom can be, well, a bit forgetful sometimes. A bit lax. A bit...CRAZY. For instance, she's a bit crazy when she leaves him in the tub for THREE HOURS. Or gives him a chicken leg for breakfast...or forgets that he needs to go to school. AND he's not completely sure his mother understands how time works. She's been even a bit MORE CRAZY since his dad left. So it's a very good thing that the folks in Kaline's tree house are not so crazy. They understand him. They don't mind that he sometimes HAS to play his pretend bugle, and, of course, they are FULL of good advice on how to handle bullies. His mom hints that the tree house is imaginary. Kaline is UNCONVINCED. The New York Times bestselling author of A Girl Named Zippy is delighted to introduce Kaline Klattermaster, a little boy who understands the importance of a few good friends -- make-believe OR otherwise.

From Neurons to Neighborhoods-Division of Behavioral and Social Sciences and Education 2000-11-13 How we raise young children is one of today's most highly personalized and sharply politicized issues, in part because each of us can claim some level of "expertise." The debate has intensified as discoveries about our development-in the womb and in the first months and years-have reached the popular media. How can we use our burgeoning knowledge to assure the well-being of all young children, for their own sake as well as for the sake of our nation? Drawing from new findings, this book presents important conclusions about nature-versus-nurture, the impact of being born into a working family, the effect of politics on programs for children, the costs and benefits of intervention, and other issues. The committee issues a series of challenges to decision makers regarding the quality of child care, issues of racial and ethnic diversity, the integration of children's cognitive and emotional development, and more. Authoritative yet accessible, From Neurons to Neighborhoods presents the evidence about "brain wiring" and how kids learn to speak, think, and regulate their behavior. It examines the effect of the climate-family, child care, community-within which the child grows.

A White Heron-Sarah Orne Jewett 2005 A nine-year-old New England girl has to decide whether or not she will help the ornithologist who is searching for the rare white heron.

Vibrant and Healthy Kids-National Academies of Sciences, Engineering, and Medicine 2019-12-27 Children are the foundation of the United States, and supporting them is a key component of building a successful future. However, millions of children face health inequities that compromise their development, well-being, and long-term outcomes, despite substantial scientific evidence about how those adversities contribute to poor health. Advancements in neurobiological and socio-behavioral science show that critical biological systems develop in the prenatal through early childhood periods, and neurobiological development is extremely responsive to environmental influences during these stages. Consequently, social, economic, cultural, and environmental factors significantly affect a child's health ecosystem and ability to thrive throughout adulthood. Vibrant and Healthy Kids: Aligning Science, Practice, and Policy to Advance Health Equity builds upon and updates research from Communities in Action: Pathways to Health Equity (2017) and From Neurons to Neighborhoods: The Science of Early Childhood Development (2000). This report provides a brief overview of stressors that affect childhood development and health, a framework for applying current brain and development science to the real world, a roadmap for implementing tailored interventions, and recommendations about improving systems to better align with our understanding of the significant impact of health equity.

Vascular Diseases for the Non-Specialist-Tulio Pinho Navarro 2017-01-03 This book aims to provide non-specialist healthcare practitioners with current, focused and objective information on the most common vascular diseases encountered in daily clinical practice. In day-to-day clinical practice many healthcare practitioners do not have a working knowledge of the most common vascular diseases that frequently arise in patient care. Some of these topics include: aneurysms, peripheral arterial disease, diabetic foot, venous thromboembolism, cerebrovascular disease, aortic dissection, and acute limb ischemia. These commonly encountered
vascular diseases are becoming public health issues due to their high morbidity and mortality as well as increasing healthcare costs. Since patients with vascular diseases are often referred to non-specialists, the general practitioner must know how to properly handle the most common vascular diseases encountered in daily clinical practice. For each disease the concept, epidemiology, natural history, diagnosis and treatment are described, followed by essential advice on what the non-specialist can do for the patient and when to refer the patient to a specialist.

Types of News Writing-Willard Grosvenor Bleyer 1916

Dmso-Morton Walker D.P.M. 1993-01-01 An easy-to-understand, up-to-date guide on the highly publicized drug, DMSO DMSO—dimethyl sulfoxide—is a simple by-product of wood and has been called a “miracle” drug, capable of relieving pain, diminishing swelling, reducing inflammation, encouraging healing, and restoring normal function. In this groundbreaking work, award-winning health science writer Dr. Morton Walker examines the powerful and compelling case for the use of DMSO in the treatment of many debilitating disease and health-related problems. In DMSO: Nature’s Healer, Dr. Walker cites documented cases of its astounding use in healing and prevention of a host of health disorders, including arthritis, stroke, cancer, mental retardation, and sports and auto injuries. He also recounts the dramatic story of the long struggle to gain FDA approval of DMSO.

Everything Here is Beautiful-Mira T. Lee 2018 A story of “two sisters—Miranda, the older, responsible one, always her younger sister’s protector, [and] Lucia, the headstrong, unpredictable one, whose impulses are huge and often life changing. When their mother dies and Lucia starts hearing voices, it is Miranda who must find a way to reach her sister. But Lucia impetuously plows ahead, marrying a big-hearted, older man only to leave him suddenly to have a baby with a young Latino immigrant. She moves her new family from the States to Ecuador and back again, but the bitter constant is that she is, in fact, mentally ill”--

Fear and Loathing-Hunter S. Thompson 2006-10-20 The "gonzo" political journalist presents his frankly subjective observations on the personalities and political machinations of the 1972 presidential campaign, in a new edition of the classic account of the dark side of American politics. Reprint.

Nutrition Across the Lifespan for Healthy Aging-National Academies of Sciences, Engineering, and Medicine 2017-05-11 In September 2016, the National Academies of Sciences, Engineering, and Medicine convened a workshop to examine trends and patterns in aging and factors related to healthy aging in the United States, with a focus on nutrition, and how nutrition can sustain and promote healthy aging, not just in late adulthood, but beginning in pregnancy and early childhood and extending throughout the lifespan. Participants discussed the role of nutrition in the aging process at various stages in life, changes in organ systems over the lifespan and changes that occur with age related to cognitive, brain, and mental health, and explored opportunities to move forward in promoting healthy aging in the United States. This publication summarizes the presentations and discussions from the workshop.

Writing DNP Clinical Case Narratives-Janice Smolowitz, EdD, DNP 2010-05-20 This portfolio presents intimate case study narratives, providing an in-depth account of DNP best practices for clinical practice. The book covers important topics such as the development of DNP clinical competencies, performance objectives, utilizing evidence-based practice, a DNP approach to adolescent care, caring for the chronically ill, mental health care, adult health care, and many more. The main purpose of this book is to provide DNP faculty and students with a reliable and detailed guide to use when implementing a format to document care provided. The case narratives presented in this book differ from the traditional case study format: students delineate all aspects of the decision-making process, identify the evidence that supports the decision, discuss the robustness of the evidence, analyze the effectiveness of the clinical decision, and critically reflect on the overall case. This detailed format captures the complexity and details of clinical practice. Key Features: Incorporates descriptive
narratives that help readers understand the complex cognitive processes employed during the provision of care. Presents information based on actual patient encounters that include the reasons for selecting the case, assessment, care provided, and outcomes. Provides evidence for all decisions made in the portfolio, which is "leveled" according to the Oxford Centre for Evidence Based Medicine. Concludes each case narrative with the DNP student's own reflection and analysis of how successfully each competency was fulfilled.

**Post-Truth** - James Ball 2017-05-11 2016 marked the birth of the post-truth era. Sophistry and spin have coloured politics since the dawn of time, but two shock events - the Brexit vote and Donald Trump's elevation to US President - heralded a departure into murkier territory. From Trump denying video evidence of his own words, to the infamous Leave claims of £350 million for the NHS, politics has rarely seen so many stretching the truth with such impunity. Bullshit gets you noticed. Bullshit makes you rich. Bullshit can even pave your way to the Oval Office. This is bigger than fake news and bigger than social media. It's about the slow rise of a political, media and online infrastructure that has devalued truth. This is the story of bullshit: what's being spread, who's spreading it, why it works - and what we can do to tackle it.

**Naval Science 2** - Richard R. Hobbs 2006-05 A Textbook on Maritime History, Leadership, and Nautical Sciences for the NJROTC Student

**A Wolf at the Table** - Augusten Burroughs 2008-04-29 "As a little boy, I had a dream that my father had taken me to the woods where there was a dead body. He buried it and told me I must never tell. It was the only thing we'd ever done together as father and son, and I promised not to tell. But unlike most dreams, the memory of this one never left me. And sometimes...I wasn't altogether sure about one thing: was it just a dream?" When Augusten Burroughs was small, his father was a shadowy presence in his life: a form on the stairs, a cough from the basement, a silent figure smoking a cigarette in the dark. As Augusten grew older, something sinister within his father began to unfurl. Something dark and secretive that could not be named. Betrayal after shocking betrayal ensued, and Augusten's childhood was over. The kind of father he wanted didn't exist for him. This father was distant, aloof, uninterested... And then the "games" began. With A Wolf at the Table, Augusten Burroughs makes a quantum leap into untapped emotional terrain: the radical pendulum swing between love and hate, the unspeakably terrifying relationship between father and son. Told with scorching honesty and penetrating insight, it is a story for anyone who has ever longed for unconditional love from a parent. Though harrowing and brutal, A Wolf at the Table will ultimately leave you buoyed with the profound joy of simply being alive. It's a memoir of stunning psychological cruelty and the redemptive power of hope.

**Spine Surgery** - Alexander R. Vaccaro 2012 Spine Surgery, 2nd Edition delivers step-by-step, multimedia guidance to help you master the must-know techniques in this field. Part of the popular and practical Operative Techniques series, this orthopaedics reference focuses on individual procedures, each presented in a highly visual, easy-to-follow format for quick reference. Access the entire text, fully searchable, online at www.expertconsult.com. Concentrate on precisely the information you need with brief, highly illustrated coverage of each surgical technique, complemented with just the right amount of relevant science. Find the answers you need quickly and easily with a strictly templated format for consistent and rapid visual reference. View 12 surgical videos at www.expertconsult.com demonstrating how to perform state-of-the-art procedures such as C1-C2 Posterior Cervical Fixation, Minimally Invasive Deformity Correction and Fusion, and Lumbar Disc Arthroplasty. Learn today's hottest techniques with new chapters on C2 translaminar fixation, vertebroplasty/kyphoplasty, internal laminectomy, and interbody fusion. See exactly what to do using step-by-step intraoperative photos demonstrating each technique, and radiographs showing presenting problems and post-surgical outcomes. Achieve optimal results using minimally invasive surgery whenever possible. Contain costs by using new implants related to pedicle screws and interbody devices, as well as new biologics such as BMP (bone morphogenetic protein). Benefit from the latest evidence-based information from randomized trials and retrospective studies.
Descent-Tim Johnston 2015-01-06 Don't miss Tim Johnston's new novel, The Current, available January 22, 2019! The Rocky Mountains have cast their spell over the Courtlands, who are taking a family vacation before their daughter leaves for college. But when Caitlin and her younger brother, Sean, go out for an early morning run and only Sean returns, the mountains become as terrifying as they are majestic. Written with a precision that captures every emotion, every moment of fear, as each member of the family searches for answers, Descent races like an avalanche toward its heart-pounding conclusion. “Read this astonishing novel . . . The magic of his prose equals the horror of Johnston’s story.”—The Washington Post “A compelling thriller that is both creepy and literary . . . Descent is not just a mystery. It is an emotional story of evil, fear, acceptance and irony.”—The Denver Post “What makes the novel unforgettable is its sense of character, its deliberate, unadorned prose and Johnston’s unflinching exploration of human endurance, physical and psychological.”—Miami Herald “A supercharged, addictive read.”—The Missourian “An original and psychologically deep thriller.”—Outside magazine “Outstanding . . . The days when you had to choose between a great story and a great piece of writing? Gone.”—Esquire “[A] dazzling debut . . . Exquisitely crafted.”—The Dallas Morning News “Incredibly powerful, richly atmospheric.”—Minneapolis Star Tribune “[An] engulfing thriller-cum-western.”—The New York Times Book Review “Brilliant . . . As gripping as any Everest expedition.”—Peter Heller, author of The Dog Stars

Chemical Kinetics and Inorganic Reaction Mechanisms-Smiljko Asperger 2011-06-27 The serious study of the reaction mechanisms of transition metal complexes began some five decades ago. Work was initiated in the United States and Great Britain; the pioneers of that era were, in alphabetical order, F. Basolo, R. E. Connick, 1. O. Edwards, C. S. Garner, G. P. Haight, W. C. E. Higgison, E.1. King, R. G. Pearson, H. Taube, M.1. Tobe, and R. G. Wilkins. A larger community of research scientists then entered the field, many of them stu dents of those just mentioned. Interest spread elsewhere as well, principally to Asia, Canada, and Europe. Before long, the results of individual studies were being consolidated into models, many of which traced their origins to the better-established field of mechanistic organic chemistry. For a time this sufficed, but major revisions and new assignments of mechanism became necessary for both ligand substitution and oxidation-reduction reactions. Mechanistic inorganic chemistry thus took on a shape of its own. This process has brought us to the present time. Interests have expanded both to include new and more complex species (e.g., metalloproteins) and a wealth of new experimental techniques that have developed mechanisms in ever-finer detail. This is the story the author tells, and in so doing he weaves in the identities of the investigators with the story he has to tell. This makes an enjoyable as well as informative reading.

Computer Vision for Biomedical Image Applications-Yanxi Liu 2005-10-10 This book constitutes the refereed proceedings of the First International Workshop on Computer Vision for Biomedical Image Applications: Current Techniques and Future Trends, CVBIA 2005, held in Beijing, China, in October 2005 within the scope of ICCV 20.

A Risk-Management Strategy for PCB-Contaminated Sediments-National Research Council 2001-06-07 This book provides a risk-based framework for developing and implementing strategies to manage PCB-contaminated sediments at sites around the country. The framework has seven stages, beginning with problem definition, continuing through assessment of risks and management options, and ending with an evaluation of the success of the management strategy. At the center of the framework is continuous and active involvement of all affected parties—particularly communities—in the development, implementation, and evaluation of the management strategy. A Risk-Management Strategy for PCB-Contaminated Sediments emphasizes the need to consider all risks at a contaminated site, not just human health and ecological effects, but also the social, cultural, and economic impacts. Given the controversy that has arisen at many PCB-contaminated sites, this book provides a consistent, yet flexible, approach for dealing with the many issues associated with assessing and managing the risks at Superfund and other contaminated sites.

Grandma Gatewood's Walk-Ben Montgomery 2014-04-01 Emma
Gatewood was the first woman to hike the entire Appalachian Trail alone, as well as the first person—man or woman—to walk it twice and three times and she did it all after the age of 65. This is the first and only biography of Grandma Gatewood, as the reporters called her, who became a hiking celebrity in the 1950s and '60s. She appeared on TV with Groucho Marx and Art Linkletter, and on the pages of Sports Illustrated. The public attention she brought to the little-known footpath was unprecedented. Her vocal criticism of the lousy, difficult stretches led to bolstered maintenance, and very likely saved the trail from extinction. Author Ben Montgomery was given unprecedented access to Gatewood’s own diaries, trail journals, and correspondence. He also unearthed historic newspaper and magazine articles and interviewed surviving family members and hikers Gatewood met along the trail. The inspiring story of Emma Gatewood illustrates the full power of human spirit and determination.

Hypoparathyroidism—Maria Luisa Brandi 2015-02-24 Hypoparathyroidism, a condition in which insufficient parathyroid hormone (PTH) is produced to maintain normocalcemia is associated with a variety of acute and chronic symptoms and complications due to hypocalcemia. Replacement therapy utilizing PTH has long been awaited, and this book is new and very timely as it coincides with the publication of results on the role of the PTH molecule in the pharmacological management of this disorder. This advance is sparking renewed interest in hypoparathyroidism, which is attributable to neck surgery in most cases and to inherited disorders in a minority. Hypoparathyroidism has been written by acknowledged experts in the field and provides essential, up-to-date information on the pathology, diagnosis, and treatment of the condition. It opens by addressing in detail the anatomy and physiology of the parathyroids and describing the epidemiology and clinical presentation of hypoparathyroidism. The full range of hypoparathyroid disorders are then discussed, including the various genetic forms, postoperative hypoparathyroidism, and other forms of acquired hypoparathyroidism. Individual chapters focus on refractory disease, the impact of the condition on bone, and the management of acute hypocalcemia. Both conventional treatment for hypoparathyroidism and the novel replacement therapy with PTH peptides are then thoroughly examined. Pseudohypoparathyroidism is also extensively discussed, with information on the various forms, differential diagnosis, and genetic testing.

This book will be of interest to all endocrinologists, and also to surgeons and internal medicine physicians.

Putting Children First—Keetie Roelen 2019-09-30 This edited volume contributes to the policy initiatives aiming to reduce child poverty and academic understanding of child poverty and its solutions. It challenges existing narratives around child poverty, exploring alternative understandings of its complexities and dynamics and examining policy options that work to reduce child poverty.

Biophysical and Chemical Properties of Collagen: Biomedical Applications—John A. M. Ramshaw 2019-11-13 Biophysical and Chemical Properties of Collagen: Biomedical Applications provides an introduction to the biophysics and chemistry of collagen and its use as a biomedical material in the rapidly changing fields of biomedical device production, tissue engineering and regenerative medicine. Written by experts in the field, this text will be of interest for researchers as well as lecturers and students.
