The Official Soviet Mosin-Nagant Rifle Manual-U.S.S.R. Army 2000-07-01 Enthusiasts of the venerable Mosin-Nagant bolt-action rifle, one of the most basic of the Russian and Soviet small arms, will find a wealth of information in the latest Soviet military manual translation by Maj. James F. Gebhardt. The manual, available in English for the first time, covers disassembly and assembly, cleaning and lubricating, and firing for zero at the specified zeroing range of 100 meters. Described in detail are all the steps, procedures and criteria that will ensure proper and safe function of the rifle or carbine. Also included are several data tables describing the ballistic performance of the 148-grain type-1908 projectile and the weight and length of the basic rifle and carbines in various configurations. For those interested in the sniper version of this rifle, an appendix describes both the PE and PU scopes. This is the ultimate source for Mosin-Nagant owners.

The Ordnance Department-

Constance Green 2015-07-02 The U.S. Army fought World War II with materiel much of which was developed in the decade prior to our entry, particularly in the period following the German blitz in Poland. Our efforts to develop munitions to the point where our armies could cope on equal terms with those of potential enemies are covered here in this, the first of three projected volumes on the history of the Ordnance Department in World War II. How well the Ordnance Department succeeded in matching the Germans in quality continues to be a matter of debate both within the Ordnance Department itself, and between the using arms and the Department. That the battle of quantity was won-with the help of a superb industrial machine-can hardly be denied. This volume, the result of diligent research by Dr. Constance McL. Green and her associates, should interest not only military men but also scientists, industrialists, and laymen in general. Among other things, it shows the urgent necessity of a directed, continuous, and intensive research

program and the danger in failing to recognize and profit by developments abroad. Also shown is the inherent time interval between the drawing board and the production of the end item in quantity."
