WALNECK'S CLASSIC CYCLE TRADER, MAY 2002-Causey Enterprises, LLC

Autorretrato-Édouard Levé Con una prosa de tono seco y engañosamente distante, Levé expone su breve pero intensa vida al lector hasta en sus más mínimos detalles. Más o menos al azar, va hilando gustos, momentos, sensaciones, anécdotas, observaciones y pareceres personales, sobre sí mismo y sobre el mundo. Ningún aspecto queda fuera: sexo, política, estética, filosofía, arte, familia, amistad, trabajo, infancia, en una sucesión de sentencias que en la

acumulación crean un ritmo hipnótico y fascinante. Un libro radical, descarnado y exquisito que poco a poco nos va desarmando, cautivando y metiendo dentro de una ficción perfecta, que fluctúa entre la realidad y el deseo, y en ese intersticio revela la fragilidad y la belleza del ser humano.

Lockheed SR-71 Blackbird-Paul F. Crickmore 2015-06-20 The SR-71 represents the very pinnacle of Cold War aircraft design and it has become an aviation icon. Together with its predecessor, the A-12, the Blackbird was a giant leap into the technical unknown and the design employed many forms of new technology made necessary by the excesses of speed, altitude and temperature to which the aircraft was subjected. Throughout its 34-year Air Force career, the SR-71 proved itself to be the world's fastest and highest flying operational manned aircraft. It set a number of world records for altitude and speed, including an absolute altitude record of 85,069ft on 28 July 1974, and an absolute speed record of 2,193.2mph the same day. This truly was a unique and ground-breaking aircraft, whose fascinating design history is explored here in full and illuminated with photographs and detailed technical illustrations.
